## European – wide sport event

### **Report on the Event "Welcome Summer '23" (Pozdrav poletju) and Presentation of the "Hand in hand" Project**

The city was lively from the early afternoon hours when the youngest runners of the "Brežice Runs" event took over the city streets. More than 250 children ran along part of the main Brežice street, from the castle to the municipal building, greeted by last season's Exatlon winner Marko Špiler and first-season participant Igor Mikić - Mišica. The runners were cheered on with entertaining comments by moderator Uroš Bitenc, who was accompanied by the Brežice elf Gvido. Following this, 155 runners participated in the recreational runs of 2 km and 6 km, and the results of the best runners were announced, with the awards presented by Mayor Ivan Molan.

The main theme of the afternoon continued to be sports. As part of the "Hand in hand", funded by the European Commission (Erasmus+ Sport), an interactive presentation of project sports took place at the venue. The youth could try:

- an innovative 3D film about the project sports,
- 10<sup>th</sup> street run: Brežice tečejo,
- street Handball,
- "Dry rowing" exercises and
- mobile bouldering wall, which garnered a lot of excitement.

After the Slovenian handball representatives opened the handball court, children also compete in street handball.

There were plenty of activities for children that day. Following the sports introduction, there was a children's party with Romana Kranjčan, and there was the usual crowd at the ZPTM Brežice animators, who provided face painting.

As the day turned into evening, music lovers had their moment. Following the exceptional Croatian band Elemental, the stage was taken by the guest tribute band of the legendary Queen, Queen Sensation from Serbia. Their performance brought the audience back to the best years of the legendary band's creation. The iconic band's presentation was so authentic that the audience enthusiastically sang along to the legendary hits.

There was no shortage of good food and drinks. Organizers continuously reminded visitors with green tips about the proper separation of waste.

### **Presentation of the "Hand in hand" Project**

During the event, we presented innovative sports and new technologies included in our project as part of the "Hand in hand" initiative.

1. 3D Film: At our booth, we presented an innovative 3D film that excited the youth about the project sports and invited them to participate in the project sports, especially the HEPA camp.

Funded by  
the European Union

The film was well-received, as the three-dimensional technology provided viewers with a unique experience and brought them closer to our sports activities.

2. Street Handball: We hosted handball representatives who played a street handball match on a specially prepared court. Visitors could watch an exciting game and also try this sport themselves. With this activity, we replaced the initially planned handball on the sand - as we could not get permission to set up the venue with sand in the old town center - the planned venue for handball is not level (the terrain slopes). The court was enclosed with project logos and was the most noticeable feature at the event venue. Street handball was a great choice because it provided an accessible and engaging way for participants of all ages to experience the sport. The urban setting added a unique atmosphere, making it easier for visitors to join in spontaneously and enjoy the dynamic nature of street handball.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

3. Dry Rowing: We prepared "dry rowing" exercises where visitors could try rowing on dry land. This activity was very well-received as it offered an interesting and unusual sports experience.

4. Mobile Bouldering Wall: One of the most popular attractions was the mobile bouldering wall, which garnered a lot of excitement. Both young and older participants could try climbing and overcoming various obstacles, contributing to the great atmosphere at the event.

5. "Brežice Runs": The largest sport activity within the event was the "Brežice Runs." This included a 300-meter children's run with over 250 participants, which was free for all children and young people. Additionally, there was a recreational run of 2 km and 6 km with 155 participants. The event was kicked off by notable guests, and the runners were cheered on with lively commentary, making the run the highlight of the day. The run was the largest sports event and was made possible only due to the project's funding, which allowed free participation for children and young people and affordable registration fees for adults.

Funded by  
the European Union

The "Welcome Summer '23" event was highly successful, bringing together different generations in a sporty and entertaining atmosphere. Throughout the day, we successfully showcased innovative forms of sports included in the "Hand in hand" project, delighting both young and older visitors. Participants enjoyed a rich program that included running activities, sports workshops, a children's program, and evening concerts. Our booth with the 3D film, the street handball presentation, dry rowing exercises, and the mobile bouldering wall further enriched the event and contributed to the greater visibility of the "Hand in hand" project. Note: The sports part of the event was co-financed by the EU; all sports presentations and training sessions for event participants and the children's run.

Additionally, we also conducted presentation of **project sports at Mestna Promenada 2023.**

In addition to the entertainment program, we successfully incorporated sports activities as part of the City Promenade 2023, supported by the "Hand in hand" project.

We set up a pool in the old town center, which was intended for rowing. The innovative setup attracted many participants who were eager to try out various rowing exercises and enjoy this water activity.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Funded by  
the European Union

Additionally, we brought a mobile bouldering wall to the old town center. This popular attraction provided an exciting challenge for both young and old. Participants had the opportunity to test their climbing skills and overcome various obstacles, contributing to the lively and engaging atmosphere of the event.

With these sports activities, we aimed to attract young people to participate in project sports, especially in the HEPA camp. These sports activities were part of our ongoing efforts to promote a healthy and active lifestyle within the community and were co-financed by the EU.

Časopis za pokrajino Posavje, leto XXVII, št. 16, četrtek, 3. avgust 2023

www.PosavskiObzornik.si

**DOBRO OBISKANA MESTNA PROMENADA** – Brežiško staro mestno jedro je bilo deset juljskih večerov prizorišče poletnega dogajanja za vse generacije in okuse. Zvrstilo se je več kot 30 dogodkov s področja glasbe, stand upa, plesa pod zvezdami in otroških animacij, pestra je bila tudi spremljevalna ponudba s stojnicami rokodelcev ter ponudnikov hrane in pijače. Po ocenah organizatorja, ZPTM Brežice, je Mestna promenada letos privabila med 10 in 12 tisoč obiskovalcev. Največ zanimanja je bilo za dalmatinski večer s Klapo Šufit in koncert hrvaške pevke Vesne Pisarović. Odličen je bil tudi obisk otroških dogodkov, še posebej ko so se lahko preizkusili v športnih aktivnostih kar sredi mesta (na fotografiji). Letošnja promenada je tudi začrtala pot k še bolj "zelenim" prireditvam. R. R., foto: Luka Rudman
